National Eosinophil Awareness Week
Public Service Announcement - Radio Messages

Prior To May 17-23, 2015

: 60

The 8th Annual National **EE-OH-SIN-O-FILL** Awareness Week will take place May 17-25 this year.

**EE-OH-SIN-O-FILLS** are a type of white blood cell that help fight off certain types of infections and parasites. When these cells are elevated in certain areas of the body, an **EE-OH-SIN-O-FILL-ICK** disease may be present. These cells respond to triggers, such as food and airborne allergens, by releasing toxins into the affected area.

**EE-OH-SIN-O-FILL** associated diseases are increasing in prevalence and are an emerging global health care problem. There is no cure.

For more information about **EE-OH-SIN-O-FILL** associated diseases, visit the website for the American Partnership for **EE-OH-SIN-O-FILL-ICK** Disorders at www.apfed.org
associated diseases are an emerging global health care problem. There is no cure. The 8th Annual National Awareness Week will take place May 17-23 this year. For more information about associated diseases, visit the website for the American Partnership for Disorders at www.apfed.org.
