Have you ever been diagnosed with Eosinophilic Gastritis and/or Eosinophilic Duodenitis?

OR

Do you experience undiagnosed gastric (stomach) symptoms such as Chronic Stomach Pain? Nausea/Vomiting? Diarrhea? Stomach Cramping? Bloating? Early Fullness? (With or without a previous diagnosis of IBS, Functional Dyspepsia or EoE)

We are looking for men and women, 18-80 years old, who have been previously diagnosed with Eosinophilic Gastritis (EG) and/or Eosinophilic Duodenitis (EoD) or have various undiagnosed gastric symptoms, to participate in a clinical research study. This study will evaluate the safety and effectiveness of an investigational medication in reducing eosinophils in the blood and the tissue of the digestive tract and improving symptoms in people with EG and EoD.

There is no cost to participate in this study. Qualified participants will receive study-related drugs, lab tests, and study-related medical care at no cost. You will also be eligible for compensation to cover the cost of time and travel. Your participation may help evaluate a potential treatment for these debilitating diseases.

To learn more about this study, or to locate your nearest study center to see if you qualify to participate, please contact:
